

EMMANUEL EDWARD

Aspiring Data Analyst · SQL, Python, Excel, Power BI

+234 916 039 0413 | emmanueledward303@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Third-year Information Technology student with hands-on data analytics experience gained through a structured self-study program in SQL, Python, Excel, and Power BI. Has built end-to-end projects that turn raw, messy data into dashboards and reports that support real decisions, including work with a 175,000+ record public dataset. Backed by a one-month remote data analytics internship and IBM and HP LIFE certifications. Seeking an entry-level Data Analyst role to apply these skills to real business problems.

TECHNICAL SKILLS

Languages & Query Tools: SQL, Python (Pandas, NumPy)

BI & Visualization: Power BI (DAX, drillthrough, bookmarks), Tableau, Excel (PivotTables, formulas)

Core Competencies: Data cleaning & wrangling, exploratory data analysis, dashboard design, data storytelling

PROJECTS

Autonomous Data Analysis Agent | *Python, Pandas, LangGraph, AI Agents*

Built a self-correcting agent that cleans messy CSV files with no human in the loop: it diagnoses data issues, applies fixes, validates its own output, retries on failure, and produces a plain-English summary report.

- github.com/emmanueledward303/autonomous-data-analysis-agent
- Skills used: Python, Pandas, AI-agent design (LangGraph), automated error handling, data cleaning

Football Recruitment Analyzer | *SQL, Power BI, Python, AI Query Tool*

Analysed whether football clubs overpay for transfers relative to on-pitch output, using a real dataset of 175,000+ records. Found that transfer fee only weakly predicts performance, then built a Power BI dashboard alongside a natural-language query tool that answers plain-English questions directly from the database.

- github.com/emmanueledward303/football-recruitment-analyser
- Skills used: SQL, data cleaning, Power BI dashboards, Python, large-scale public dataset analysis

HR Employee Attrition Analysis | *SQL Server, Power BI, DAX*

Investigated attrition drivers across 1,470 employee records: designed the underlying database structure, wrote SQL to surface patterns, and built a 3-page Power BI dashboard. Identified that newer employees on lower salaries were far more likely to leave, and delivered a clear recommendation on where to focus retention efforts.

- github.com/emmanueledward303/Hr-attrition-project
- Skills used: SQL (joins, CTEs, window functions, stored procedures), database design, Power BI, DAX, business reporting

EXPERIENCE

Data Analytics Intern — Decodelabs (Remote)

1 Month

- Applied SQL, Excel, and Python to real-world data tasks during a one-month remote internship.
- Translated classroom data analysis knowledge into practical business-analysis work.

Student Representative — Redeemer's University Students' Association (RUNSA)

Sep 2026 – Present

- Represent student interests and serve as a communication link between the student body and university administration.

EDUCATION

B.Sc. Information Technology — Redeemer's University

Expected 2028

Relevant coursework: Computer Architecture, Networking, System Analysis & Design, Human-Computer Interaction, Information Security

CERTIFICATIONS

- IBM — Data Analysis with Python & SQL
- IBM — Relational Databases 101
- HP LIFE — Data Science & Analytics
- Jobberman — Soft Skills Certification
- Google Developer Program — Member
